

# CAS ( FULL CONE NOZZLES / CLUSTER NOZZLE )

## CLUSTER NOZZLE / STANDARD SPRAY ANGLE

CAS cluster nozzles have seven orifices, large spray capacities and produce very fine droplets using hydraulic pressure only. As the droplets size, among other factors, also depends on the nozzle size, these multi-orifice nozzles produce a finer spray than a standard full cone single-orifice nozzle working at the same pressure and delivering the same quantity of liquid. They surely are the best choice when fine mist effect and large spray capacity are required.

THREAD SPECIFICATION: BSP, NPT

### TYPICAL APPLICATIONS

- Cooling:*  
cooling of high-temperature gas
- Fire control:*  
watermist fire suppression systems
- Other applications:*  
exhaust gas treatment, dust control, wetting

Spray section

Even distribution
